

Pwsmage VPOS Poste Italiane Payment Magento Extension

Dear Customer,

thank you very much for choosing our extension.

This manual will guide you to the correct installation and configuration of our module, by the way if you will get into troubles installing or using the module you can come to our site and ask for support.

Firstly you will need to contact your VPOS Poste Italiane account manager to get the all the configuration parameters for your account. Than you can start installing and configuring your VPOS. Your VPOS representative will give you a set of php libraries to install on you root magento folder. If you are not sure about this task, you can ask for support to our team.

Description

VPOS Poste Italiane Payment Extension it's a new payment method that will let your web site collect payment with Poste Italiane on line solution. VPOS payment module will let you smoothly and trustly integrate in your ecommerce web site the VPOS payment system. All the transactions will be done on a secure server SSL, to grant the best security on your customers data. VPOS configuration is pretty easy and it's integrated in Magento system configuration under the Sales, Payment methods section.

You can also configure settings for your test environment, so that you can easily do all the necessary simulations before going on line.

Our support team will be glad to assist you in every step, until your VPOS payment is successfully ready to collect payments.

Installation

After downloading the package, you will have to unpack the zip file into your drive, than upload the zip content to your magento root. You will have to upload the the stadndard php IGFS libraries on your magento root. This libraries are necessary to our module.

Login to your admin, clear the cache, logout and login again.

You will have to upload also you license file to your magento root.

Configuration

Enter in System->Config->Sales->Payment Methods

The VPOS module is composed of 3 different modules: Bancoposta Online, Credit card, PostePay
You can use every module independently from each other.

The screenshot shows the 'Payment Methods' configuration interface. On the left is a navigation menu with categories: Configuration (GENERAL, CATALOG, INTRAWEB, SALES), and Payment Methods. The main content area is titled 'Payment Methods' and includes a link for help. Below is the configuration for 'BancoPosta Online' with various settings and their scopes.

Field	Value	Scope
Enabled	No	[WEBSITE]
New order status	-- Please Select --	[WEBSITE]
Sort order		[WEBSITE]
Title	BancoPosta Online	[STORE VIEW]
Payment to applicable countries	All Allowed Countries	[STORE VIEW]
Payment to Specific countries	Alghanistan, Albania, Algeria, Andorra, Angola, Anguilla, Antartide, Antigua e Barbuda, Antille Olandesi, Arabia Saudita	[STORE VIEW]
Production Server URL		[STORE VIEW]
Test Server URL		[STORE VIEW]
Terminal ID		[WEBSITE]
Chiave Signature		[WEBSITE]
Timeout		[WEBSITE]
Transaction Type	Autorizzazione	[WEBSITE]
Currency Code	EUR	[STORE VIEW]
▲ Seleziona la valuta supportata dal VPOS, attualmente solo EUR.
